

Power. Protect. Charge. Sync.

myPower™ for iPhone® 4 RECHARGEABLE BATTERY CASE with eSwap™ Replaceable Battery Module

myPower for iPhone 4, the ultra slim rechargeable battery case for iPhone 4, lets you talk, rock, view, share, and stay connected longer. This compact battery case doubles as a dock for automatic syncing, and as a case to protect your iPhone 4 from everyday wear and tear.

Equipped with a replaceable efficient lithium polymer battery pack, myPower for iPhone 4 preserves your iPhone 4 battery by bypassing the battery and directly powering (rather than charging) your iPhone 4. When plugged into a USB power adapter or computer USB port, myPower for iPhone 4 will charge itself and the connected iPhone 4 battery. A bright dual-color LED shows the capacity level at a quick glance.

With its highly innovative eSwap technology (patent pending), myPower for iPhone 4 lets you exchange the battery module on the go. That way, you can have extra battery packs at your fingertips, so you're not limited by the capacity of a single external battery.

The lightest battery case available for iPhone 4, myPower for iPhone 4 includes a micro USB cable so you can dock your iPhone 4 for charging and automatic syncing to a connected computer.

Why myPower for iPhone 4?

- Delivers power for hours of extra play/work time through an innovative bypass that preserves the iPhone 4 battery by powering, not charging, iPhone 4
- eSwap™ technology lets you swap the battery module on the go to more than double, triple (or more) the amount of power you get with myPower for iPhone 4
- Ultra slim case provides power without unnecessary bulk
- Protects from everyday wear and tear
- High-speed micro USB 2.0 interface automatically syncs your iPhone 4
- Simultaneously charges iPhone 4 while connected to power source
- Easy access to all iPhone 4 features
- Comfortable soft touch finish
- Bright, dual-color capacity indicator shows remaining power at a glance
- On/Off switch conserves power
- Enhances iPhone 4 reception
- Reliable and safe lithium polymer battery
- myGuard™ protector prevents potential scratches to iPhone

What is eSwap?

eSwap technology lets you swap the battery module on the go to double, triple, or more, the amount of power you get with myPower for iPhone 4. Optional ultra slim eSwap battery modules available.
