

# NavDock™

## Home Media Center with On-TV Navigation for iPod

ND2000

NavDock™ Home Media Center with On-TV Navigation for iPod lets you navigate your iPod through an on-TV menu to play videos, photos and music on a connected television. NavDock browses directly through your iPod menus, so finding and playing music and videos is easy. And you can use the 16-button remote to adjust or mute volume, shuffle, repeat or skip songs, and fast forward or rewind through music or videos. The remote offers a five-way navigation pad and quick keys that jump directly to the videos, photos, music or settings menus.

With NavDock, you have complete control. You can change the language, menu color scheme to fit your mood, or navigation speed to fit your taste. You can even access the equalizer or display the lyrics to your favorite songs. And for your personalized screensaver, you can display the album art for the current song.

- Remote navigation of videos and music via on-TV menu
- Play slideshow on TV
- Viewable song lyrics
- On-TV access to equalizer presets
